MASUPARIA GOLD CORPORATION

MANAGEMENT DISCUSSION & ANALYSIS

For the Quarter Ended December 31, 2010

1.1 Date of This Report

1.2 Overall Performance

Description of Business

Masuparia Gold Corporation (the “Company”) is a publicly listed company trading under the symbol “MAS” (formerly “MPG”) on the TSX Venture Exchange (the “Exchange”). The Company was formerly in the mineral exploration business; however, during 2000, the Company divested its mineral exploration interests and reflected these operations as discontinued. Subsequent to this divestiture, the Company announced that it was contemplating a Change of Business from mining exploration to the non-resource sector. It then entered into an agreement to acquire a financial services company offering online trading and clearing services to international financial institutions through a fully functional website. This proposed Change of Business was not concluded and the Company returned to the mining sector in 2001 seeking opportunities in the resource industry.

The Company currently owns a 51% stake in the Greywacke gold property, in Saskatchewan.

1.4 Results of Operations

Discussion of Acquisitions, Operations and Financial Condition

The following should be read in conjunction with the financial statements of the Company and notes attached hereto.

Mineral Properties

As at December 31, 2010, the Company had the following mineral properties interests:

Greywacke Property

On May 21, 2001, the Company entered into an option agreement with two companies (the "Optionors") whereby the Company could earn a 51% interest in four mineral claims located in northern Saskatchewan for the following consideration:

- i) \$10,000 (paid);
- ii) 16,665 common shares (issued); and
- iii) incurring exploration of \$850,000 (incurred).

The Greywacke property is located 85 kilometers north-east of La Ronge, Saskatchewan and comprises four (4) mineral claims totaling 268 hectares. A resource estimate by Cameco in 1991, based on 30 drillholes, outlined 298,000 tonnes grading 9.2 g/t gold in the Greywacke North Zone. A subsequent resources estimate by Wardrop in 2004 estimated 254,000 tonnes grading 8.79 g/t gold using a 5 g/t gold cut-off. It should be emphasized that these two historical estimates are unclassified, not compliant with NI 43-101 requirements, and should not be relied upon as an accurate representation and estimation of the gold resources. A small drill program undertaken by the company in 2005 on the Greywacke North deposit drilled a best intercept grading 8.2 g/t gold over 26.64 meters. Drilling results indicate that the deposit is open at depth. The Greywacke South and Lyons Zone are smaller additional gold zones identified and drilled historically, with best drilled intercepts of 5.3 g/t gold over 4.25 m and 26.4 g/t gold over 1.9 m respectively.

Greywacke – Exploration Results

Permit acquisition and initial planning and preparation for an exploration program on the Greywacke property took place during February 2008, and a drilling program of nineteen holes for a total of 3000.73 metres was completed in April 2008 and split-core samples were submitted to TSL Laboratories in Saskatoon for assay.

Assay results for the first eleven drillholes, all drilled within the North Zone were contained in a press release on May 21, 2008. Results for the remaining drillholes on the North and South zones were contained in a press release on June 16, 2008. The program results contained information which extended the economic potential of both the North and South zones and provided indications of economic potential in the area between these zones.

Greywacke – Future Developments

The Company is reviewing the results of the exploration to date and is formulating an exploration plan to better define the economic potential of the property.

Prior to the 2008 drill program, the Company commissioned Wardrop Engineering Inc. (Toronto) to do an NI 43-101 compliant resource estimate and the results were released to the public on April 7, 2008. Wardrop reported an Indicated Resource of 184,000 tonnes grading at 8.40 grams per tonne gold plus an Inferred Resource of 58,000 tonnes at 7.29 grams per tonne gold at a cut-off of 5 grams per tonne gold. The technical report is available for viewing on the company website at www.masupariagold.com.

Ungava Property

On July 30, 2004, the Company reached an agreement with Goldbrook Ventures Inc. (“Goldbrook”), whereby Goldbrook acquired 100% of the Company’s interest in this property. As consideration Goldbrook delivered 3,000,000 common shares to the Company.

This Agreement replaced the option previously granted to Goldbrook by the Company to earn up to an 80% interest in the Property. The Property is subject to a 1% net smelter return royalty on any mineral production from the Property. Goldbrook has the option to purchase one-half of this royalty for \$1 million.

Discussion of Operations and Financial Condition

Results of Operations

The net loss for the three months ended December 31, 2010 were \$58,310 as compared with \$64,701 for the three months ended December 31, 2009. The decrease in net loss was mainly due to fewer activities during the current quarter after the Mexican subsidiary was sold in the year ended September 30, 2010.

During the three months ended December 31, 2010, the Company incurred management fees of \$18,000 (2009 – \$18,000) and professional fees of \$9,156 (2009 - \$7,139).

The Company also recognized \$9,238 unrealized loss on available-for-sale assets during the quarter ended December 31, 2010 while \$277,145 unrealized gain was recognized during the comparative quarter ended December 31, 2009. Those unrealized gains are classified as other comprehensive income and are not included in the net loss.

Investor Relations Activities

During the three months ended December 31, 2010, the Company issued press releases, responded to investor inquiries and conducted shareholder mailouts. Shareholder inquiries were handled either by directors of the Company or spokespersons specifically assigned to respond to any shareholder or investor calls. The Company has no formal investor relations agreement in place.

1.5 Summary of Quarterly Results

The following is a summary of the Company's unaudited financial results for the eight most recently completed quarters:

	Q1 <u>31-Dec-</u> <u>10</u>	Q4 <u>30-Sept-</u> <u>10</u>	Q3 <u>30-June-</u> <u>10</u>	Q2 <u>31-Mar-</u> <u>10</u>	Q1 <u>31-Dec-</u> <u>09</u>	Q4 <u>30-Sept-</u> <u>09</u>	Q3 <u>30-June-</u> <u>09</u>	Q2 <u>31-Mar-</u> <u>09</u>

Discussion

For the three months ended December 31, 2010, please refer to Section 1.4 Results of Operations.

1.6 Liquidity

As the Company has no revenue generating projects at this time, the ability of the Company to carry out its business plan rests with its ability to secure equity and other financings. At December 31, 2010, the Company's working capital deficit was \$153,714, compared to a working capital deficit of \$95,143 as at September 30, 2010.

The Company will require additional financing to fund any new acquisitions, exploration programs as well as its holding costs on all of its properties. The ability of the Company to successfully fund the mineral properties and to acquire additional projects is conditional on its ability to secure financing when required. The Company proposes to meet any additional financing requirements through the exercise of outstanding warrants, or arranging other forms of equity financing. In light of the continually changing financial markets, there is no assurance that funding by equity subscriptions will be possible at the times required or desired by the Company.

1.7 Capital Resources

The capital resources of the Company are the capital assets with a carrying value of \$6,551, and the mineral properties, with a historical cost of \$1,359,969. The Company is committed to further expenditures on the mineral properties, as detailed in Section 1.4 Results of Operations.

1.8 Off Balance Sheet Arrangements

There is no off-balance sheet arrangements to which the Company is committed.

1.9 Transactions with Related Parties

During the three months ended December 31, 2010 and 2009, the Company was charged the following amounts by companies owned by directors:

	<u>2010</u>	<u>2009</u>
Management fees	\$ 18,000	\$ 18,000
Consulting fees – financial	3,750	3,750
– investors’ relations	6,000	6,000
Equipment rental	4,359	4,359
Professional fees	4,500	4,500
Rent	<u>1,500</u>	<u>1,500</u>
	<u>\$ 38,109</u>	<u>\$ 38,109</u>

These charges were measured by the exchange amount which is the amount agreed upon by the transacting parties.

At December 31, 2010, the Company had an advance payable of \$140,000 (2009: \$Nil) to a company controlled by a director of the Company. The advance payable was unsecured, non-interest bearing payable on demand.

1.10 First Quarter

The first quarter results do not differ significantly from other quarters.

1.11 Proposed Transactions

None.

1.12 Critical Accounting Estimates

The Company uses the Black-Scholes option valuation model to calculate the fair value of share purchase options at the date of grant. Option pricing models require the input of highly subjective assumptions, including the expected price volatility. Changes in these assumptions can materially affect the fair value estimate.

1.13 Changes in Accounting Policies

Future Accounting Pronouncements -International Financial Reporting Standards (IFRS)

In February 2008, the Canadian Accounting Standards Board announced 2011 as the changeover date for publicly listed companies to use IFRS, replacing Canadian generally accepted accounting principles. The specific implementation is set for interim and annual financial statements relating to fiscal years beginning on or after January 1, 2011.

The Company's year end is September 30 of each year. The first year of reporting for the Company using IFRS will be for the fiscal 2012 year commencing October 1, 2011 and ending on September 30, 2012. Accordingly, the Company will prepare its financial statements for fiscal 2011, the year ending September 30, 2011, using Canadian GAAP. In 2012, the Company will present its fiscal 2012 financial statements, with comparatives for fiscal 2011, using IFRS. This will necessitate the Company maintaining financial records in both GAAP and IFRS for fiscal 2011.

The key elements, timing and status of the Company's changeover plan are outlined below:

- Develop internal knowledge to manage changeover, design systems and produce IFRS reports. Accounting staff have commenced upgrading their knowledge and will continue throughout the process.
- Review accounting policy changes that are required or are optional under IFRS on conversion and make choices where necessary. An internal review is being conducted for major differences between IFRS and Canadian GAAP, where it is likely to affect the Company. It is expected that this review will be completed in the second quarter of 2011. When these changes and proposed decisions have been made, the audit committee and board will be provided with the knowledge to evaluate the proposed changes.
- Prepare 2011 opening balance sheets and reconciliations of 2011 interim and year end statements to Canadian GAAP statements of the same periods. The target will be to prepare these statements as soon as practicable through 2011. It is expected that draft opening balance sheets will be prepared during the second quarter.
- Review internal control implication of new policies and changeover. Internal control implications are targeted to be determined before the changeover date of October 1, 2011.
- Review disclosure controls and procedures in light of change to IFRS. Disclosure controls and procedures implications will be determined before the changeover date of October 1, 2011.

1.14 Financial and Other Instruments

The recoverability of the amounts capitalized for the mineral properties under exploration is dependent upon the determination of economically recoverable ore reserves, the ability to obtain the necessary financing to complete the development, and future profitable production or proceeds from the disposition thereof.

1.15 Other

Restatement:

During the preparation of the financial statements for the year ended September 30, 2010, the Company determined that a future income tax recovery had been incorrectly presented in the financial statements for the year ended September 30, 2009.

As at September 30, 2009, the fair value of the Company's marketable securities designated as available-for-sale exceeded the tax basis of these investments by \$209,350. These unrealized gains gave rise to a future income tax liability of \$14,000. The Company had sufficient non-capital losses available to reduce this future income tax liability to zero.

In accordance with CICA EIC 172, "Income Statement Presentation of a Tax Loss Carryforward Recognized Following an Unrealized Gain Recorded in Other Comprehensive Income", the reduction of the future income tax liability should have been recorded as a recovery in the statement of operations rather than as a recovery in other comprehensive income. This accounting policy was in effect for the Company's fiscal year ended September 30, 2009 where retroactive adoption was required.

The financial statements for the year ended September 30, 2009 have accordingly been adjusted to increase the future tax recovery in the statement of operations and reduce the unrealized gain on available-for-sale financial assets in comprehensive income by \$14,000. The impact on basic and diluted gain loss share is a decrease in the loss per share from (\$0.73) to (\$0.72). In addition the financial statements for the year ended September 30, 2009 have been accordingly adjusted to decrease both the opening deficit and accumulated comprehensive income by \$12,000 to reflect the impact on the opening figures as a result of the retroactive adoption of EIC 172.

Summary of restatement:

September 30, 2009	As Previously Reported	Adjustment	As Restated
Income tax (expense) recovery	\$ -	\$ 14,000	\$ 14,000
Net loss for the year	(\$ 2,700,712)	\$ 14,000	(\$ 2,686,712)

Disposition of Subsidiary

On April 12, 2010, the Company sold 100% of its shares in its Mexican subsidiary, Minera Masuparia S.A. de C.V. ("Minera") to an unrelated third party for gross proceeds of \$95,971 less \$23,993 withheld for Mexican income tax purposes. A gain in the amount of \$89,930 was recognized on the statement of operations and comprehensive loss as the amount of gross proceeds of \$95,971 less \$6,041 being the net book value of the net assets of Minera.

Additional Disclosure

The Company is a venture issuer that has not had any revenue from operations in either of its last two financial years. The Company has capitalized all expenditures relating to the exploration of its mineral property until such time as the properties are placed into production, abandoned, sold, or considered to be impaired in value. Details of deferred expenditures for the properties for the three months ended December 31, 2010 are as follows:
